Hugo Petla

Team Leader | NextJs | ReactJs | React Native | VueJs | Redux | UI/
UX Designer | Frontend Developer
Ponta Grossa, Paraná, Brazil

Summary

Passionate professional with a strong interest in innovative projects,
high scalability potential, and the use of advanced technology.
Holds a degree in Computer Engineering and a Master's degree in
Applied Computing from Universidade Estadual de Ponta Grossa.
Standout achievements include a Master's thesis on blockchain
technology and receiving the first-place award for the Milktech
startup in the Alltech Innovation Competition – Brazil 2016. Expertise
in the development and analysis of software and hardware systems,
products, and processes, using appropriate models. Experience
as a front-end developer, acquired as a Senior Developer at
Compass Uol, with a focus on Nextjs/React systems development.
Possesses excellent leadership and team management skills,
problem-solving and negotiation skills, acquired in the role of
Pedagogical Coordinator at UPTIME. Exceptional interpersonal and
relationship-building skills.

Experience

Compass.uol
Senior Frontend Developer
December 2021 - Present (1 year 7 months)

In my role as a Frontend Developer, I specialize in web development using
Nextjs/React. With a strong understanding of both client and server-side
development, I am skilled in utilizing various libraries such as Redux,
Material-UI (mui), Lodash, and others to deliver high-quality web applications.
My expertise in developing responsive and accessible user interfaces,
optimizing performance, and implementing best practices for modern web
development has enabled me to deliver outstanding solutions for clients across
diverse industries. I am committed to staying up-to-date with the latest web
technologies, tools, and frameworks and applying them to create compelling
and visually engaging web applications that meet user needs and exceed
expectations.

Schaffen IT
Front end Analyst
October 2020 - December 2021 (1 year 3 months)
Brasil

Work in collaboration with the squad to develop and maintain back-office applications and interfaces in order to improve administrative operations. Responsible for prototyping UI / UX interface design, simulating the user experience.

Tech stack: Vue.js, Vuex

UPTIME
2 years 1 month

Learning Assistant
May 2019 - September 2020 (1 year 5 months)
Ponta Grossa, Parana, Brazil

I worked as the responsible for managing the team of instructors and service; organizing the classes; monitoring the collective and individual learning process of the students; and promoting conflict resolution.

Instructor
September 2018 - August 2019 (1 year)
Ponta Grossa, Parana, Brazil

The UPTIME's mission is to transform lives by teaching a foreign language, encouraging entrepreneurship and training leaders.

UEPG
Master in Applied Computing
March 2018 - May 2020 (2 years 3 months)
Ponta Grossa, Parana, Brazil

KMM
Developer
March 2017 - March 2018 (1 year 1 month)

I worked in the mobile development of the CRM system (customer relationship management), using the Ionic framework. Soon after, I became responsible for the mobile development of the Route Now system (collection and transport management) of the Via Lácteos company.
